	737				
	100	180	8	44	10
	735				

Universal rollers

General purpose rollers, so called middle range rollers meet the requirements of demanding consumer who ask for a higher performance of a product. Higher performance of the roller is achieved thanks to the padding under the fabric cover. The padding does not take the paint. Rollers are intended for coating inner and outer plasters and surfaces characterised by low unevenness (granularity up to 3 mm).

VESTAN YELLOW - 18 mm pile, cushioned, polyester fabric. Dispersion paints

160	250	8	53	10
137				

Profi paint rollers

Order Nr.    

PROFI rollers (all padded) are intended for coating all plasters, particularly facades characterised by higher unevenness (granularity from 5 to 10 mm). Specialized painting companies will certainly appreciate their high performance, super padding and the fabric quality. The padding does not take in paint and thanks to its low weight is suitable for all day work.

VESTAN YELLOW - 18 mm pile, polyester fabric. Dispersion paints

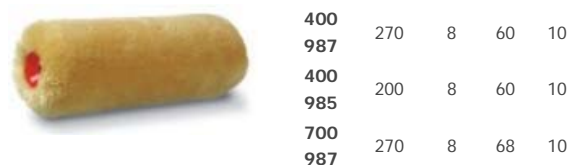

KANALINE - 18 mm pile, polyester fabric. Dispersion paints

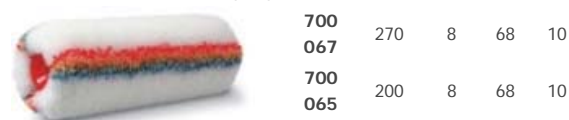

PERLAFLOR - 18 mm pile, polyacryl fabric. Dispersion and latex paints

KREACE 40

191 345 180 8 44 10

To obtain color effects with relief rollers we offer a special frame and KANAPOREN roller. KANAPOREN roller transfers the paint to the relief roller. The paint tray is perfect to take up the paint.

Special frame for CREATION 4 - 6 + 17 - 29 + 126 - 134

819 503 180 8 1
